

No	Interaction ID	Interaction Name	Failure Short Name	Failure Description	Response
1	1	User - Components	SSL certificate error	An error occurs when the browser cannot verify the SSL certificates returned by the server.	Browser blocks the website and warns the user that the website cannot be trusted as shown below. These warnings will negatively impact the user's website trust.
2	5	User Service - Core App	Service unreachable	Core App won't be able to reach service if the last will loose connection or will be turned off	All requests which require User Service won't be handled.

3	6	Services - LNU App	Service unreachable	LNU App won't be able to reach service if the last will loose connection or will be turned off	All requests which require any of the Service won't be handled.
4	4	User Service - Auth App	Bad auth: Authentication	Entered incorrect credentials	User is not logged in
5	2	Component s - Services	LNU credentials expire	We can not establish a connection with LNU if credentials will expire after a certain amount of time	API Gateway (which is a proxy server) can not proceed with the request and send/receive messages from the pool

6	8	LNU App - LNU Database	No space left on disk	We won't be able to create new events if server won't have enough memory	Errors for any create event request, reading events will work as usual
7	7	Core App - LNU Database	Database unreachable	We may lose access to DB due to connectivity issues	Service won't be able to write new changes to DB but will be able to handle read requests with precached info
8	9	Auth App - LNU Database	No space left on disk	We won't be able to create new user	Errors for creating user
